Prototyping of user interface (SE-014)
(KASUTAJALIIDESE PROTOTÜÜPIMINE)

SUBJECT DESCRIPTION

Credits (ECTS)	4.00 ECTS
Assessment	grading
Aim of the subject and short description	

The course gives☐an overview of the approaches and stages in modern design processes.☐Participants☐obtain knowledge about incorporating users and involved parties☐into the design process, mapping out and documenting their needs and designing☐ prototypes☐at different levels of detail. Students work in☐small groups (3-4 people) and create a prototype user interface meant for one☐or several platforms by the end of the course. The course addresses the following topics: Overview of user interface☐ design process (different approaches, stages)

Learning outcomes:

Student:

1. Knows what user interface design means and is able to distinguish good and poor user interface designs
2. Knows fundamental principles and basic mistakes of user interfaces
3. Recognizes main problems in database modelling and is able to eliminate them
4. Can create user interface prototypes
